and downtime!

BGP Monitoring

7Sigma's BGP monitoring service helps detect and prevent security threats such as prefix hijacking, route leaks, and other malicious activities. It includes monitoring IRR and RPKI to ensure optimal routing and prevent announcement issues on the public Internet.

Key features

- **Security Threat Detection:** Identify and prevent prefix hijacking, route leaks, and malicious activities
- **IRR & RPKI Monitoring:** Ensure optimal routing and prevent issues with incorrect announcements
- **24/7/365 Alerts:** Real-time email alerts on any change
- **Routing Insights:** comprehensive insights on Internet routing changes and risks
